

Harvard Continental Climate Workshop

June 13-14, 2024

Organizers: Kaighin McColl (Harvard) and David Battisti (University of Washington), with funding from the Salata Institute for Climate and Sustainability.

Location: The workshop will be held at the Harvard University Center for the Environment (HUCE). Here are [detailed directions to HUCE](#).

[Harvard University Center for the Environment \(HUCE\)](#)

26 Oxford St, 4th floor, Cambridge, MA 02138
617-495-0368

Accommodation: All attendees without accommodation in the greater Boston area will be provided lodging at Hotel 1868 in Porter Square, Cambridge, for the nights of June 12, 13 and 14. The hotel is a 15 minute walk from HUCE. If we are providing lodging, you should have received an email confirmation of your reservation already – if not, please contact Stephanie Clayman.

[Hotel 1868](#)

1868 Massachusetts Ave, Cambridge, MA 02140
617-499-2998

Meals and refreshments: A light breakfast, as well as lunch, dinner and coffee will be provided each day. All meals and refreshments will be held in HUCE. The one exception to this will be dinner on June 13 at 6:00 PM at a nearby restaurant, a 10 minute walk from HUCE.

[Harvest](#)

44 Brattle St, Cambridge MA 02138
(On the walkway, directly across the street from the Church St/Brattle St intersection)
617-868-2255

Talks: Each speaker will have 30 minutes in total. Please aim to speak for no more than 20 minutes, to allow plenty of time for questions and discussion. To facilitate smooth transitions between speakers, we plan to have all slide presentations downloaded to a local PC laptop (Mac users: please consider saving your slides as a PDF to avoid compatibility problems). Please upload your slides to the emailed Dropbox (or email your slides to sclayman@fas.harvard.edu) by **noon on Wednesday, June 12. Please also bring a backup copy on a thumb drive or laptop.**

Internet access: Harvard provides internet access for visitors through eduroam.

Contact:

Kaighin McColl: kmccoll@seas.harvard.edu, 781-866-0672

David Battisti: battisti@uw.edu, 206-295-0356

Stephanie Clayman: sclayman@fas.harvard.edu, 617-495-3637

Agenda

Day 1 (June 13)

8:30-9:00 am	Breakfast	
SESSION 1		
9:00-9:10	Introduction: Kaighin McColl and David Battisti	
9:10-9:40	Paul O’Gorman	<i>Response of convective precipitation extremes to changes in surface relative humidity</i>
9:40-10:10	Angeline Pendergrass	<i>Long-term changes in the shape of the precipitation distribution over land from station observations</i>
10:10-10:40	Michael Byrne	<i>Revisiting land relative humidity in a changing climate</i>
10:40-11:10	Break	
SESSION 2		
11:10-11:40	Marysa Lagüe	<i>Radiative effects of continental water vapor</i>
11:40-12:10 pm	Abigail Swann	<i>Atmospheric feedbacks modulate changes in land water and carbon fluxes</i>
12:10-1:00	Discussion	
1:00-1:40	Lunch at HUCE	
SESSION 3		
1:40-2:10	Abe Stroock	<i>Stomatal and non-stomatal regulation of plant-atmosphere coupling</i>
2:10-2:40	Scott McAdam	<i>Dynamic stomatal responses – diversity over time and space</i>
2:40-3:10	Paul Moorcroft	<i>The changing Arctic carbon budget: interactions between vegetation, hydrology, and soil temperature</i>
3:10-3:30	Break	
SESSION 4		
3:30-4:00	Guido Salvucci	<i>Evaporation through the laminar, surface, and convective boundary layers</i>
4:00-4:30	Fulton Rockwell	<i>Control of daily transpiration by a characteristic soil flux under drought</i>
4:30-5:00	Dara Entekhabi	<i>Distinct land-atmosphere coupling pathways during the warm and cold seasons resulting in continentality</i>
5:00-5:50	Discussion	
6:00	Dinner at Harvest	

Day 2 (June 14)

8:30-9:00 am	Breakfast	
SESSION 1		
9:00-9:30	Kaighin McColl	<i>Radiative-convective equilibrium over an idealized land surface with fixed soil moisture</i>
9:30-10:00	Rong Fu	<i>Effects of local and remote land surface feedbacks on drought dynamics and predictability over US Great Plains</i>
10:00-10:30	Flavio Lehner	<i>The current southwestern US drought is driven by anthropogenic forcing of both temperature and precipitation</i>
10:30-11:00	Break	
SESSION 2		
11:00-11:30	David Battisti	<i>Land-atmosphere coupling and summertime temperature variability and trends in the Western U.S.</i>
11:30-12:00 pm	Paolo D’Odorico	<i>Agriculture and the trilemma of water sustainability, inequality, and justice: How to reconcile human and environmental water needs</i>
12-12:50	Discussion	
12:50-2:00	Lunch at HUCE	
SESSION 3		
2:00-2:30	Karen McKinnon	<i>Pacing summertime temperature extremes</i>
2:30-3:00	Lucas Vargas Zeppetello	<i>Should we expect more intense heat waves as the climate warms?</i>
3:00-3:30	Justin Mankin	<i>Faster than we thought? An evaluation of the pace, magnitude, and exposure of daily temperature records in observations and models</i>
3:30-4:00	Break	
4:00-5:00	Discussion	
5:00	Dinner at HUCE
